1) LOGIN ISSUE: Faced an issue while booting up and logging wouldn't take any password and gave issues. [By Maitreyee Rao]
● https://www.raspberrypi.org/forums/viewtopic.php?t=157836 : This forum helped me solve the issue.
● I disabled in buildroot menuconfig --> system configuration --> [n]Enable login into getty prompt.

2) Keyboard Issue: At boot keyboards from manufacturers like Apple and Microsoft does not work at Raspberry Pi boot time. [By Disha Modi]
● https://www.raspberrypi.org/forums/viewtopic.php?t=94510 : This forum helped me solve the issue. Specifically the comment done on Wed Jan 27, 2016 9:46 pm.
● I followed the same thing, I updated the /etc/inittab file by adding `::sysinit:/sbin/modprobe hid-microsoft` this line. And, enabled use of eudev as device manager system: System configuration -> /dev management into make menuconfig.
